

This is a sample document testing nested link text. The `glossaries-extra` package temporarily modifies commands like `\gls` or `\glsxtrshort` that occur in fields, when any of those field is accessed through linking commands.

First use: [SSI enabled HTML \(SHTML\)](#).

Next use: **SHTML**.

## Glossary

**HTML** hypertext markup language [1](#)

**SHTML** [server side includes \(SSI\)](#) enabled [hypertext markup language \(HTML\)](#)  
[1, 2](#)

**SSI** [server side includes](#) [1](#)
