

The `uacoursetext` class*

Paul Levrie (`paul.levrie@ua.ac.be`)
Walter Daems (`walter.daems@ua.ac.be`)

2013/05/11

1 Introduction

This package implements the house style of Universiteit Antwerpen for course texts and master's theses except for the font. Computer Modern Bright is used instead of the non-free Auto1. Using these class files will make it easy for you to make and keep your course texts and master's theses compliant to this version and future versions of the UA house style.

If you think

- there's an error in compliancy w.r.t. the house style,
- there's a feature missing in this class file,
- there's a bug in this class file,

please, contact us through e-mail (`walter.daems@ua.ac.be`). We'll provide you with an answer and if (and as soon as) possible with a solution to the problem you spotted.

Do you like these class files? You're welcome to send us beer, wine, or just kind words.

2 Synopsis

The `uacoursetext` and `uamasterthesis` classes are an extension to the standard `LATEX book` class. It is intended to be used for writing course texts and master's theses. It provides a title page that is compliant to the UA house style, and it also typesets the rest of your document appropriately.

*This document corresponds to `uacoursetext` 1.0, dated 2013/05/11.

It requires (and uses) the following packages:

- the `ifthen` package
- the `mtarg` package
- the `geometry` package
- the `hyperref` package
- the `cmbright` package
- the `graphicx` package
- the `eso-pic` package
- the `color` package
- the `tikz` package
- the `fancyhdr` package
- the `pst-barcode` package
- the `auto-pst-pdf` package

and optionally

- the `varioref` package.

So make sure these packages are available to your \LaTeX compiler.

3 Portability

This class file should be ready to use with all common \LaTeX compilers (PDF \LaTeX , \LaTeX , Xe \LaTeX ,...) from the major \TeX -distributions (TeX \TeX , TexLive, MikTeX). If you experience problems, please inform the authors.

4 Usage

4.1 Basic Usage

4.1.1 `uacoursetext` class

Use the following harness for your \LaTeX course text:

```

\documentclass[a4paper]{uacoursetext}

\usepackage{<include any packages you require here>}

\facultyacronym{<put your faculty's acronym here>}

\title{<put your title here>}
\subtitle{<put your subtitle here>}
\author{<put your name here>}

\courseversion{<put a version identifier here>}
\versionyear{<the publication date of the course here>}

\lecturer{<person teaching the course>}
\programme{<descriptor of first programme>}
\course{<course code>}{<name of the course>}%

\academicyear{<XXXX-YYYY>}

\begin{document}

    \maketitle

    % put your LaTeX code here

    \finalpage

\end{document}

```

4.1.2 uamasterthesis class

Use the following harness for your L^AT_EX master's thesis:

```

\documentclass[a4paper]{uamasterthesis}

\usepackage{<include any packages you require here>}

\facultyacronym{<put your faculty's acronym here>}

\title{<put your title here>}
\author{<put your name here>}
\supervisorI{<put the first supervisor's name(s) here>}
\supervisorII{<put the first supervisor's name(s) here>}
\supervisorIII{<put the first supervisor's name(s) here>}
\supervisorIV{<put the first supervisor's name(s) here>}

% classmarker
\academicyear{<XXXX-YYYY>}

```

```

\begin{document}

\maketitle

% put your LaTeX code here

\finalpage

\end{document}

```

4.2 The macros explained

After every macro, it has been indicated to which class the macro applies (between square brackets), and whether it is mandatory or not.

\facultyacronym [uacoursetext / uamasterthesis] (mandatory)
This macro sets the acronym of the faculty. This macro also sets the faculty name according to the specified acronym. If you're missing an faculty or institute, please ask the authors to complete the list.

The available acronyms are:

Acronym	Faculty name
CPG	Centrum Pieter Gillis
FBD	Faculteit Farmaceutische, Biomedische en Diergeneeskundige Wetenschappen
GGW	Faculteit Geneeskunde en Gezondheidswetenschappen
IOB	Instituut voor Ontwikkelingsbeleid- en beheer
IOIW	Instituut voor Onderwijs- en Informatiewetenschappen
LW	Faculteit Letteren en Wijsbegeerte
OW	Faculteit Ontwerpwetenschappen
PSW	Faculteit Politieke en Sociale Wetenschappen
REC	Faculteit Rechten
TEW	Faculteit Toegepaste Economische Wetenschappen
TI	Faculteit Toegepaste Ingenieurswetenschappen
WET	Faculteit Wetenschappen

\title [uacoursetext / uamasterthesis] (mandatory)
This macro sets the title of the document. It also sets the **pdftitle** tag of the hyperref package, so that the PDF-document meta-information is correct.

\subtitle [uacoursetext] (optional)
This macro sets the title of the document. You may use this

- to further clarify the title

- to indicate the nature of this document

The latter is to be considered when you want to provide multiple documents as parts of the full course text (e.g., Course Notes, Formula Collection, Exercise Book, Solution Book). This macro also sets the **subject** tag of the hyperref package, so that the PDF-document meta-information is correct.

<code>\author</code>	[uacoursetext / uamasterthesis] (mandatory) This macro sets the author of the document. It also sets the pdfauthor tag of the hyperref package, so that the PDF-document meta-information is correct.
<code>\publisher</code>	[uacoursetext] (mandatory) This macro sets the publisher information of the document. It is printed on the front page. It defaults to Universitat printing, one of the standard printing service of Universiteit Antwerpen.
<code>\publishercode</code>	[uacoursetext] (mandatory) This macro sets the publisher code of the document. It is printed on the front page. This is code that the publisher uses for its internal administration. It may be a proprietary code, or an ISBN number.
<code>\courseversion</code>	[uacoursetext] (optional) This macro indicates which version of the course this is. You may use your own versioning system that puts things clear for you.
<code>\versionyear</code>	[uacoursetext] (mandatory) This is to be the year in which you published the current version of the course in the form YYYY.
<code>\lecturer</code>	[uacoursetext] (mandatory) This is the name of the person that actually teaches the course (in Dutch: titularis). If there are multiple persons, please, use the macros <code>\lectureri</code> , <code>\lecturerii</code> , <code>\lectureriii</code> , <code>\lectureriv</code> .
<code>\programme</code>	[uacoursetext] (mandatory) This macro takes three arguments: <ul style="list-style-type: none"> • the type of the programme: BA, SP, VP or MA • the domain of the programme: IW • the qualifier of the programme: BK, CH, BCH, EM, EI

If you need more programme classes or qualifiers, ask the authors to complete the available codes. Correct usage of the macro will result in error-free descriptions on your title page. You can overrule the standard descriptions, by specifying 'FREE' as first argument and a free text description as second, leaving the third one empty. However, we strongly advise against taking this route. Instead, ask the authors to complete the available codes.

\supervisor [uamasterthesis] (mandatory)
This is the name of the person that promotes the thesis. If there are multiple persons, please, use the macros **\supervisor*i***, **\supervisor*ii***, **\supervisor*iii***, **\supervisor*iv***.

\course [uacoursetext] (mandatory)
Code (first argument) and name (second argument) of the curriculum course this course material belongs to. The code should be of the form: TNNFFFAAA, with:

Code	Explanation
T	a number indicating the type of programme (1 for Bachelor courses, 2 for Master courses , 5 for specific courses of preparatory programmes)
NNN	a number assigned by the Faculty's administration
FFF	the acronym of your Faculty, e.g., FTI
AAA	an alphanumeric code assigned by the Faculty's administration

An example of such a code: 1001FTIWIS, for the first-semester mathematics course of the Faculty of Applied Engineering.

The name should be of the form **x-YYYYYYYY** with **x** the number of the semester and **YYYYYYYY** the official name of the course.

\course [uacoursetext] (mandatory)
In case the course's name contains accented characters, one should also provide a qr version, containing utf8-characters only. The macro for this purpose takes only one argument, i.e. the course's name! This is to avoid inconsistencies in the course codes.

\academicyear [uacoursetext / uamasterthesis] (mandatory)
Use this macro to specify the academicyear in full, i.e. in the form **XXXX-YYYY**.

\diploma [uamasterthesis] (mandatory)
This must be the official title, in Dutch. To avoid errors, we chose to use specific codes, that will expand to the correct description.

Code	Description (in Dutch!)
MA-IW-BK	Master of Science in de industriële wetenschappen: bouwkunde
MA-IW-BCH	Master of Science in de industriële wetenschappen: biochemie
MA-IW-CH	Master of Science in de industriële wetenschappen: chemie
MA-IW-EI	Master of Science in de industriële wetenschappen: elektronica-ICT
MA-IW-EI-AE	Master of Science in de industriële wetenschappen: elektronica-ICT, afstudeerrichting, Automotive Engineering
MA-IW-EI-ICT	Master of Science in de industriële wetenschappen: elektronica-ICT, afstudeerrichting ICT
MA-IW-EM-AE	Master of Science in de industriële wetenschappen: Elektromechanica, afstudeerrichting Automotive Engineering
MA-IW-EM-AU	Master of Science in de industriële wetenschappen: Elektromechanica, afstudeerrichting Automatisering
MA-IW-EM-EM	Master of Science in de industriële wetenschappen: Elektromechanica, afstudeerrichting Elektromechanica

<code>\defensedate</code>	[uamasterthesis] (mandatory) Date of the defense in Dutch, in the form 'month year', e.g. "juni 2012".
<code>\defenselocation</code>	[uamasterthesis] (optional) Location of the defense. Defaults to "Antwerpen".
<code>\copyrightnotices</code>	[uacoursetext] (optional) Use this macro to specify additional copyright notice messages to appear in het copyright notice on the bottom of page 2 of your course text.

4.3 Examples

4.3.1 uacoursetext

```

<*ct-example>
\documentclass[a4paper,11pt,oneside,openright,english]{uacoursetext}

5 Implementation

5.1 Class inheritance

For simplicity, we'll derive everything from the standard `book` class.

Before loading the class, we provide an extra

- 'copyright' option (only for `uacoursetext` class) that forces printing a watermark on every page. For the paper version of your document, this is inappropriate, but for any e-copy you make available, this may be appropriate;
- 'titlepagetableonly' option (only for `uacoursetext` class) that forces only the title-page data to be printed in table form as first page. Many publishers require the manuscript to be delivered in this form. They perform the entire typesetting of the title page.
- 'qr' option (only for `uacoursetext` class) that allows you to generate a QR code containing the details of the course on the title page (or the table-only) title page. For this option to work, the package `pstricks` is loaded. It will not work with `pdfLATEX` unless you enable shell escape. Read you `pdfLATEX`-package documentation on how to do that.
- 'titlepagenoartwork' option that forces the title pages to print without circle graphics and logo. This allows for printing on a pre-printed color sheet that already contains circle graphics and logo;

```
1 <*ct>
2 \newif\if@copyright
3 \DeclareOption{copyright}{\@copyrighttrue}
4 \newif\if@qr
5 \DeclareOption{qr}{\@qrtrue}
6 </ct>

7 <*ct | mt>
8 \newif\if@titlepagenoartwork
9 \DeclareOption{titlepagenoartwork}{\@titlepagenoartworktrue}
10 \newif\if@titlepagetableonly
11 \DeclareOption{titlepagetableonly}{\@titlepagetableonlytrue}
12 </ct | mt>
```

We execute some standard options: We load the `book` class.

```

13 <*ct | mt>
14 \ExecuteOptions{a4paper,11pt,final,oneside,openright}
15 \ProcessOptions
16 \LoadClassWithOptions{book}
17 </ct | mt>

```

5.2 Modern typesetting

Let's force some modern typesetting without paragraph indentation and with a decent paragraph spacing.

```

18 <*ct | mt>
19 \setlength{\parindent}{0pt}
20 \addtolength{\parskip}{0.75\baselineskip}
21 \setcounter{secnumdepth}{3}
22 </ct | mt>

```

5.3 Auxiliary packages

Reinventing the wheel is a waste of time, let's preload some appropriate auxiliary packages that have proven their value.

5.3.1 Geometry

Let's reduce the margins to 1 inch each.

```

23 <*ct | mt>
24 \RequirePackage[top=1in, bottom=1in, left=1in, right=1in]{geometry}
25 </ct | mt>

```

5.3.2 Font packages

The utf8 stuff has been disabled because of the barcode package that screws up on that encoding.

```

26 <*ct | mt>
27 \RequirePackage{cmbright}
28 \RequirePackage{ifluatex}
29 \RequirePackage{ifxetex}
30 \ifluatex
31 \RequirePackage{fontspec}
32 %\setmainfont{Calibri}
33 %\setsansfont{Calibri}
34 \else
35 \ifxetex

```

```

36 \RequirePackage{fontspec}
37 %\setmainfont{Calibri}
38 %\setsansfont{Calibri}
39 \else
40 \usepackage[final,expansion=true,protrusion=true,spacing=true,kerning=true]{microtype}
41 \fi
42 \fi
43 \</ct | mt>

```

5.3.3 Boilerplate packages

Some boilerplate packages and an empty macro to test against (using\ifx)

```

44 \<*ct | mt>
45 \RequirePackage{ifthen}
46 \RequirePackage{ifmtarg}
47 \newcommand{\@emptymacro}{}
48 \</ct | mt>

```

5.3.4 Graphics packages

Graphics packages that are required for the title page, but may come in handy for regular use as well.

Some packages for coursetext and masterthesis:

```

49 \<*ct | mt>
50 \RequirePackage{graphicx}
51 \RequirePackage{eso-pic}
52 \RequirePackage{color}
53 \RequirePackage{tikz}
54 \</ct | mt>

```

In uacoursetext we also want to generate a qr code. Therefore we load the pst-barcode and auto-pst-pdf package.

```

55 \<*ct>
56 \if@qr
57 \RequirePackage{pst-barcode}
58 \RequirePackage{auto-pst-pdf}
59 \fi
60 \</ct>

```

5.3.5 Header/Footer

The de-facto standard for headers and footers:

```

61 <*ct | mt>
62 \RequirePackage{fancyhdr}
63 </ct | mt>

```

5.4 Colors

```

64 <*ct | mt>
65 \definecolor{uacorpbord}{cmyk}{0.00,1.00,0.60,0.37}
66 \definecolor{uacorpblue}{cmyk}{1.00,0.25,0.00,0.50}
67 \definecolor{uacorpplightblue}{cmyk}{1.00,0.00,0.08,0.13}
68 \definecolor{uacorporange}{cmyk}{0.00,0.32,1.00,0.09}
69 \definecolor{uافتifresh}{cmyk}{0.34,1.00,0.00,0.00}
70 \definecolor{uافتisober}{cmyk}{0.10,1.00,0.00,0.49}
71 \definecolor{lightgray}{cmyk}{0.00,0.00,0.00,0.05}
72 </ct | mt>

```

5.5 Tags

`\facultyacronym` The `facultyacronym` sets the faculty acronym tag `\@facultyacronym` that is used in the header/footer information. The correct acronym also sets the faculty's name correctly.

```

73 <*ct | mt>
74 \newcommand{\@facultyacronym}{}
75 \newcommand{\@faculty}{}
76 \newcommand{\@qrfaculty}{}
77 \newcommand{\facultyacronym}[1]{
78   \renewcommand{\@facultyacronym}{#1}
79   \ifthenelse{\equal{#1}{CPG}}{\renewcommand{\@faculty}{Centrum
80     Pieter Gillis}}{
81     \ifthenelse{\equal{#1}{FBD}}{\renewcommand{\@faculty}{Faculteit
82       Farmaceutische, Biomedische en Diergeneeskundige Wetenschappen}}{
83       \ifthenelse{\equal{#1}{GGW}}{\renewcommand{\@faculty}{Faculteit
84         Geneeskunde en Gezondheidswetenschappen}}{
85         \ifthenelse{\equal{#1}{IOB}}{\renewcommand{\@faculty}{Instituut
86           voor Ontwikkelingsbeleid- en beheer}}{
87           \ifthenelse{\equal{#1}{IOIW}}{\renewcommand{\@faculty}{Instituut
88             voor Onderwijs- en Informatiewetenschappen}}{
89             \ifthenelse{\equal{#1}{LW}}{\renewcommand{\@faculty}{Faculteit
90               Letteren en Wijsbegeerte}}{

5.6 Header and Footer

The `fancyhdr` package is used to make a decent header and footer. The header and footer of the `uacoursetext` package are defined to be:

```

388 <*ct>
389 \if@twoside
390 \lhead[\thepage]{\slshape\rightmark}
391 \chead[]{}
392 \rhead[\slshape\leftmark]{\thepage}
393 \lfoot[Universiteit Antwerpen -- \@facultyacronym]{\@courseversion}
394 \cfoot[]{}
395 \rfoot[]{\@title{}\@ifmtarg{\@subtitle}{}{ ---- \@subtitle}}
396 \else
397 \lhead[]{\leftmark}
398 \chead[]{}
399 \rhead[]{\thepage}
400 \lfoot[]{\@courseversion}
401 \cfoot[]{\UA--\@facultyacronym}
402 \rfoot[]{\@title{}}
403 \fi
404 </ct>

```

The header and footer of the `uamasterthesis` package are defined to be:

```

405 <*mt>
406 \if@twoside
407 \lhead[\thepage]{\slshape\rightmark}
408 \chead[]{}
409 \rhead[\slshape\leftmark]{\thepage}
410 \lfoot[Universiteit Antwerpen -- \@facultyacronym]{}
411 \cfoot[]{}
412 \rfoot[]{\@title{}}
413 \else
414 \lhead[]{\leftmark}
415 \chead[]{}
416 \rhead[]{\thepage}

```

```

417 \lfoot[]{}
418 \cfoot[] {UA--\@facultyacronym}
419 \rfoot[] {\@title{}}
420 \fi
421 \</mt>

```

Some common code remains:

```

422 \<*ct | mt>
423 \renewcommand{\headrulewidth}{1pt}
424 \renewcommand{\footrulewidth}{1pt}
425 \pagestyle{fancy}
426 \raggedbottom
427 \raggedright
428 \pagenumbering{arabic}
429 \onecolumn
430 \</ct | mt>

```

5.7 Copyright notice

`\@crnotice`

```

431 \<*ct>
432 \newcommand{\@crnotice}{
433   This document has been typeset using \LaTeX{} and the
434   \texttt{uacoursetext} class.\
435   \@copyrightnotices
436
437   \@courseversion
438
439   CONFIDENTIAL AND PROPRIETARY.
440
441   \copyright{} \@versionyear{} Universiteit Antwerpen, All rights reserved.
442 }
443 \</ct>

```

5.8 Title page

`\maketitle` The title page is generated using the `\maketitle` command. As the book class from which we inherit already defines this command, we need to renew it.

The UA house style works with large-radius circles. We need some math in order to calculate center points and radiuses

Header circle: the blue header-circle on top of the page. We calculate the center point and the radius based on:

- the fact that the center point is above the page's left edge;
- the distance of the intersection points at the left and right edge of the page with respect to the top of the page, X and Y respectively;
- the width of the page W .

Some simple trigonometry leads to the elevation of the center point above the top of the page Q and the radius R :

$$R = \frac{W^2 + (X - Y)^2}{2(X - Y)} \quad (1)$$

$$Q = R - X \quad (2)$$

We labeled the variables in the code below with a prefix `ua@` and a suffix `h` (from 'header'). We also took the `paperheight` into account (the page's coordinate system origins at the left bottom. Therefore:

```

444 <*ct | mt>
445 \pgfmathsetmacro{\ua@Wh}{\paperwidth}
446 \pgfmathsetmacro{\ua@Xh}{0.2\paperheight}
447 \pgfmathsetmacro{\ua@Yh}{0.125\paperheight}
448 \pgfmathsetmacro{\ua@XMyh}{\ua@Xh-\ua@Yh}
449 \pgfmathsetmacro{\ua@Rh}{0.5*\ua@Wh/\ua@XMyh*\ua@Wh+0.5*\ua@XMyh}
450 \pgfmathsetmacro{\ua@Qh}{\ua@Rh-\ua@Xh+\paperheight}
451 </ct | mt>

```

Bottom circle A: the bottom circle with the largest radius. We calculate the center point and the radius based on:

- the fact that the center point is at a distance of $3/5$ page width from the right page edge. We denote that distance as W ;
- the fact that the horizontal bottom tangent line of the circle is at a specific height above the bottom page edge, labeled S ;
- the distance of the intersection points at the right edge of the page with respect to the horizontal bottom tangent line of the circle, denoted as $X - Y$.

Given these definitions, almost the same equations as for the header circle hold:

$$R = \frac{W^2 + (X - Y)^2}{2(X - Y)} \quad (3)$$

$$Q = R + S \quad (4)$$

with R the circle's radius, and Q the elevation of the center point above the page's bottom.

We labeled the variables in the code below with a prefix `ua@` and a suffix `ba` (from 'bottom a'). Therefore:

```

452 <*ct | mt>
453 \pgfmathsetmacro{\ua@Wba}{0.4*\paperwidth}
454 \pgfmathsetmacro{\ua@Sba}{0.125*\paperheight}
455 \pgfmathsetmacro{\ua@XMYba}{0.02*\paperheight}
456 \pgfmathsetmacro{\ua@Rba}{0.5*\ua@Wba/\ua@XMYba*\ua@Wba+0.5*\ua@XMYba}
457 \pgfmathsetmacro{\ua@Qba}{\ua@Rba+\ua@Sba}
458 </ct | mt>

```

Bottom circle B: the bottom circle with the smallest radius. The same reasoning leads to:

```

459 <*ct | mt>
460 \pgfmathsetmacro{\ua@Wbb}{0.65*\paperwidth}
461 \pgfmathsetmacro{\ua@Sbb}{0.14*\paperheight}
462 \pgfmathsetmacro{\ua@XMYbb}{0.06*\paperheight}
463 \pgfmathsetmacro{\ua@Rbb}{0.5*\ua@Wbb/\ua@XMYbb*\ua@Wbb+0.5*\ua@XMYbb}
464 \pgfmathsetmacro{\ua@Qbb}{\ua@Rbb+\ua@Sbb}
465 </ct | mt>

```

Text alignment': The text is aligned around an imaginary vertical line around $2/5$ page width distance from the left edge.

```

466 <*ct | mt>
467 \pgfmathsetmacro{\ua@ll}{0.15*\paperwidth}
468 \pgfmathsetmacro{\ua@l}{0.4*\paperwidth}
469 \pgfmathsetmacro{\ua@d}{0.1in}
470 \pgfmathsetmacro{\ua@rr}{0.85*\paperwidth}
471 </ct | mt>

```

Below, one can find the code for the title page of the `uacoursetext` class:
